# Instruct-MusicGen: Unlocking Text-to-Music Editing for Music Language Models via Instruction Tuning

Yixiao Zhang

2020

Finding

We already have text-to-music generation model, but what is the next step of text-to-music editing model? We investigate different aspects for text-based music editing methods, including LLM agents, semantic editing for diffusion models, and PEFT methods for music language models.

Question

How do we let AI music generation tools facilitates content creators in a better way? What control can be utilised for human-AI music co-creation?
